Date of Birth: August 19, 2003

Professional Summary

Full-Stack Developer with over one year of experience building real-world applications at Caliber Venture Builder. I've worked on everything from interactive gaming platforms to blockchain payment systems, always focusing on creating solutions that actually work and perform well. My toolkit includes TypeScript, React, Node.js, and various databases, with particular strength in integrating TON blockchain and developing real-time features. I enjoy tackling complex problems and turning ideas into polished, user-friendly applications.

Professional Experience

AIE Telegram Mini App — Gaming Platform

Technologies: React.js, Node.js, MySQL, JWT, Canvas API, WebSocket

- Architected and developed interactive 2D shooting game with real-time multiplayer functionality
- Implemented secure authentication system with JWT tokens and session management
- Built responsive game engine using HTML5 Canvas API and React state management
- Optimized MySQL database operations resulting in 40% improved API response times
- Integrated daily rewards system with automated user engagement tracking

LaiCity E-commerce Platform — Blockchain Integration

Technologies: TypeScript, Express.js, MySQL, TON SDK, Prisma ORM

- Designed comprehensive RESTful API architecture using TypeScript for enhanced reliability
- Integrated TON blockchain payment gateway supporting cryptocurrency transactions
- Developed scalable database schema with normalized design supporting high-volume operations
- Implemented automated payment verification system with webhook integration
- Built admin dashboard for transaction monitoring and user management

SRS Real Estate Gaming — Mobile-First Platform

Technologies: Next.js, PostgreSQL, TypeScript, Telegram API, Tailwind CSS

- Transformed complex Figma designs into pixel-perfect, responsive React components
- Implemented server-side rendering with Next.js for optimal SEO and performance
- Designed normalized PostgreSQL database with advanced indexing and query optimization
- Integrated Telegram Mini App SDK for seamless mobile user experience
- Developed real-time property simulation algorithms with PostgreSQL triggers

Optimex Multi-Chain Trading — DeFi Dashboard

Technologies: React.js, Node.js, Chart.js, Web3.js, Redis, Docker

- Built comprehensive cryptocurrency trading dashboard with real-time data visualization
- Integrated multiple blockchain networks including Layer 2 solutions and cross-chain protocols
- Implemented Redis caching layer achieving sub-second data retrieval performance
- Developed WebSocket connections for live price feeds and transaction monitoring
- Containerized application with Docker for scalable cloud deployment

Technical Expertise

Core Programming

- **Languages:** TypeScript, JavaScript (ES6+), Python
- **Advanced:** C/C++, Java

Frontend Development

- React.js, Next.js, HTML5/CSS3
- Tailwind CSS, Material-UI
- Responsive Design, Canvas API

Backend Development

- Node.js, Express.js
- RESTful APIs, GraphQL
- Microservices, SSR

Blockchain & Web3

- TON Blockchain, Ethereum
- Smart Contracts, DeFi
- Web3.js, Crypto Integration

Database Systems

- **SQL:** MySQL, PostgreSQL
- **NoSQL:** MongoDB, Redis
- **ORM:** Prisma, Query Optimization

Development Tools

- Git, Docker, Linux
- VS Code, Postman, Webpack
- Jest, npm/yarn, CLI Tools

Cloud & DevOps

- AWS Services, CI/CD
- Docker Compose, Deployment
- Performance Optimization

Specialized Skills

- Real-time Apps (WebSocket)
- Game Development
- Payment Gateway Integration

Education

2021–2025 **Bachelor of Engineering in Informatics & Computer Engineering**, *Vietnam National University – International School*, Hanoi, Vietnam, **GPA: 3.20/4.0**

Relevant Coursework: Software Engineering, Database Systems, Computer Networks, Data Structures & Algorithms, Machine Learning, System Architecture, Web Development

Key Project Contributions

Interactive Gaming Applications Developed real-time multiplayer games with secure authentication and performance optimization

Blockchain & DeFi Solutions Built cryptocurrency payment systems and multi-chain trading platforms

Enterprise Web Applications Created scalable business solutions with modern UI/UX and robust backend architecture

Mobile-First Platforms Designed responsive applications optimized for mobile and web environments

Achievements & Recognition

2024 **Third Prize Winner**, *School-Level Student Scientific Research Competition*, Vietnam National University
Outstanding research in autonomous vehicle obstacle avoidance systems

2023 **Competition Finalist**, *Golf Robot Competition*, Hanoi University of Industry
Advanced to final round among top national competitors

2022 **Top 30 Finalist**, *Finnovation Fintech Startup Challenge*, Vietnam
Selected from 500+ participants for innovative fintech solution

Professional Certifications

2021 **APTIS English Proficiency Certification**, *British Council*, Level B2
Professional working proficiency in English communication

Languages

Vietnamese Native proficiency

English Professional working proficiency (B2 Certified)

Additional Information

Portfolio Complete project showcase available at: **ascendant-line-315114.web.app**

Availability Immediately available for full-time opportunities
